

HISTALIM

EUROPEAN RING TEST
FOOD HISTOLOGY

Ring-test 2009

Like the last 3 years, HISTALIM will organize the European ring test for food histology.

At the last Food Histology Meeting, future topics for the ring test were discussed in a workshop. In 2009 the theme “Knack sausages” has been chosen. Samples would be sent at the end of April or no later than in the beginning of May 2009. Moreover, we have chosen to change the online form to an Excel document sent by e-mail for the results communication.

We will be glad to share end exchange with you around this ring test.

Best regards

Jean-Philippe COTON
HISTALIM
